

# TAHOE

## Tahoe Family

Capable of meeting the most demanding applications of today's video professionals, the **Tahoe** routing switcher family is our most extensive line of analog routing switchers setting the industry standard in mid-sized switchers for more than a decade. With over twenty frame styles to choose from, Tahoe frames can be under-populated with modules, providing flexibility for future expansion.

### FEATURES:

- 16, 20, 32 and 48 inputs in a variety of standards
- Analog composite video/audio
- AFV and video-only configurations
- Y-C or S-VHS video [2 channels]
- RS-232 serial interface control; RS-485 control panel network
- Up to 64 panels on a simple twisted pair network
- Battery backed-up RAM protection of all personality and crosspoint information
- 256 salvo registers capable of holding a total of 1,000 or more crosspoints

Multiple frames can be connected together (up to 8 levels) under the same Tahoe control system. For multiple frames, only one Tahoe serial control module is required. With high-end performance, modest prices and an extensive variety of models, the Tahoe family offers significant features found nowhere else in this size or price range.
