

# DVF-Studio File Transfer Software for the V1 & MCS

**DVF-Studio** is a complete application software for the import, export, and exchange of files via Ethernet between PC systems and Doremi Labs' V1 & MCS Servers.

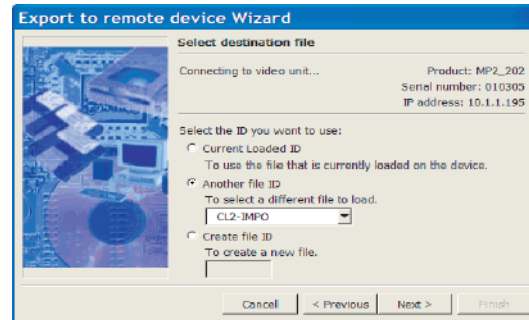

**Exchange** native DVF file formats between Doremi Servers or import to a PC for backup purposes.

**Import** editable file formats directly to your PC without using a capture card.

**Transfer** a sequence of still graphic files to the PC from the Doremi Server

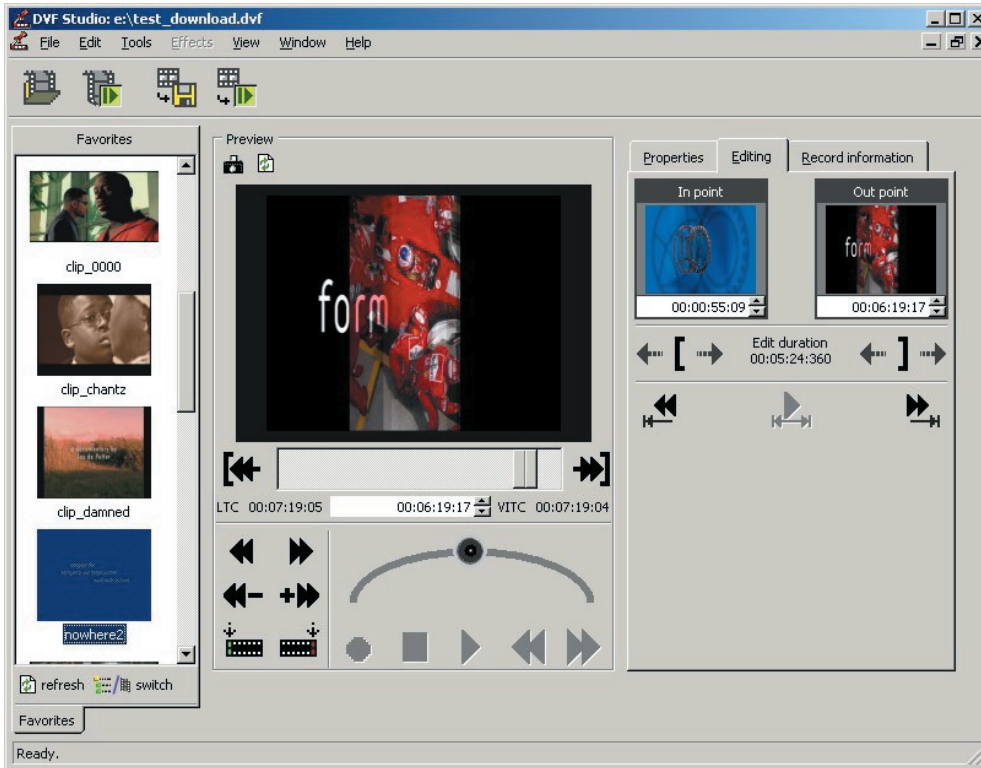

Select the Export format from the drop down list

Choose the destination file and/or time code location on the Doremi Server

Video on the V1 or MCS Server can be browsed for monitoring or editing purposes prior to import to the PC workstation

## File Formats Supported

**V1-MP2 or MCS to PC**  
Video: DVF, MXF, AVI, MPEG

**PC to V1-MP2 or MCS**  
Video: DVCPro (25Mbs)

**PC to any MCS or V1**  
Video: DVF

**V1 DCT Series to PC**  
Video: DVF, AVI

**V1-U or V1-UHD to PC**  
Video: DVF, AVI  
Stills: TARGA, BMP, RGB, JPEG, GIF, DXF

\*\*The DVF format is the native file format on the MCS and V1
